

### SPECIFICATION

Model NO.	AC94
-----------	------

## **Features**

- Online firmware upgrade, synchronous update function and experience
- intelligent push, filter out useless information
- Support Android, IOS intelligent terminal remote real-time monitoring
- Support alarm input and output control functions, can control strobe lights in linkage, and can also be used for linkage control of alarm equipment
- ◆ 2.0mp HD Pixel (1920X1080), clear picture quality
- Support preset point setting and recall function, support up to 6 preset points, support preset point cruise function
- Support accurate humanoid tracking, and can set the quard position. After the target tracking is completed, it can automatically return to the guard position and wait for the next tracking.
- Wired and wireless automatic switching, in the environment of poor wireless signal, you can directly use the wired connection device and router, automatically switch to wired mode
- ◆ Support TF card recording and cloud recording, TF card supports up to 128G
- Support cloud service, free 3-day cloud service experience package
- Support two-way voice call function, module onboard power amplifier IC, can effectively eliminate echo, suppress noise, prevent distortion and other phenomena
- Support device sharing function (support sharing multiple friends) and device management identity transfer function
- ◆Infrared night vision lighting (night vision distance 15 meters), 24-hour monitoring day and night, IR-CUT switching, no color cast during the day, and clearer night vision

## **Specifications**

# Main Processor

SOC	ARM
-----	-----

## Image Sensor

illage Jelisoi	
Sensor	1/3" color CMOS sensor
Lens	M12, f: 4mm, F2.3, 3-megapixel
Visual angle	H (horizontal) 67 degrees; V (vertical) 50 degrees; D (diagonal) 88 degrees
Minimum illumination	0.01Lux

Audio	
Input/Output	Two-way voice intercom available (built-in Microphone and speaker)
Audio compression method	AAC
